PROFESSIONAL SUMMARY

Full-stack developer with experience building web platforms, microservices, AI-integrated products, and automation systems. Strong background in React, Next.js, Vue.js, Node.js, cloud tooling, and modern frontend architecture. Comfortable owning features end-to-end, from product design and implementation to deployment and optimization. Highly proficient with AI-assisted development workflows and AI coding tools, including Claude.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Vue.js, Micro-Frontend TypeScript, Tailwind CSS, Material-UI, Shadcn/UI, Vite/Webpack/Rollup configuration, SEO Optimization, Chrome Extension/Widget, PWA, Service Worker
- **Backend:** Node.js (Express, NestJS), RESTful APIs, Microservices architecture
- **Databases:** MongoDB, PostgreSQL, Redis, MariaDB
- **DevOps & Tools:** Git, Docker, AWS, EC2, nginx, CI/CD, Agile/Scrum, AI integration, Claude, AI coding tools, MCP server

PROFESSIONAL EXPERIENCE

MobiFone Solutions

Vietnam

Full-stack Developer

August 2026 - Present

- **National Investment Gateway:** Developed a **dynamic eForm generation system** that renders configurable forms from reusable definitions, supporting faster delivery and maintenance of digital government workflows
- Built a centralized **notification gateway service** for the microservices ecosystem, enabling consistent asynchronous notification delivery and integration across services
- Designed and implemented a **Claude-powered workflow orchestration system**, increasing project delivery velocity by **4×**
- Collaborated with cross-functional teams to build scalable, maintainable services for a national-scale public-sector platform

Sotatek

Vietnam

Full-stack Developer

2021 - July 2026

- **Setel Platform:** Contributed to payment system development for Malaysia's largest fuel retail platform, improving **API performance by 40%** and maintaining **critical financial infrastructure**
- **Treasury Team:** Managed **financial reporting systems**, monitored **cash flow sources**, and ensured **compliance with financial regulations** for multi-million dollar transactions
- Contributed to government petrol subsidy distribution system, payment processing features, and reporting components
- **Elite Co:** Contributed to the development of an application providing logistics supply chain solutions using **Domain Driven Design** and **Hexagonal architecture**. Responsible for delivering features such as: **bookings report, drivers management, shipments tracking**.
- **Wexopay:** Led and architected projects, including designing landing page, implementing backend, and developing **sophisticated authentication system for multi-device login**
- **Micro Frontend Architecture:** Implemented using **Module Federation, Vite**, and **React** with **independent deployment capabilities**
- **CarExpert Project:** Created module review car, developed reusable components with **Storybook**, and achieved **100% unit test coverage** for all components

Freelancer

Vietnam

Independent Developer

2021 - Present

- **AREXA:** Developed comprehensive cryptocurrency trading platform with **AI-powered chart analysis** and **automated trading order generation**. Built **Telegram bot module** for automatic user management (add/remove users based on token expiration), implemented **cron jobs** for trading block crawling, developed **API endpoints** for indicator data retrieval, and optimized performance through **caching strategies, data compression**, and **query optimization**.
- Developed CRM features for Hoorfatt, implementing solutions for customer management, order processing, notifications, and reporting
- Built document management system for zipk using blockchain technology for secure document submissions
- **UClone:** Developed AI platform for creating personalized AI clones, featuring user authentication, clone creation tools, and interactive chat system. Implemented **AI integration** with multiple models (DeepSeek R1, ChatGPT o3, Gemini 2.5) and **decentralized collaborative AI** architecture
- **KendoAI:** Contributed to platform development, implementing **AI-powered features** for **sales training** and **prospect modeling**
- **Eventify:** Developed key features for web app, including **event management, ticketing systems, payment processing**, and **reporting functionalities**
- **ColdDMs Pro:** Built **automated Instagram messaging system** through **Chrome extension development**
- Upgraded Entoro's React application to use modern features and libraries
- Created Taobao-to-Vietnam ordering system for MBY Logistic, including backend, frontend, and Chrome extension components

Bixgrow

Front-end Developer

Vietnam

2020

- Contributed to affiliate marketing platform on Shopify
- Developed core frontend components and structure
- Built customizable registration systems for Shopify merchants
- Created promotional tools integrated with Shopify
- Implemented localization system with user customization
- Developed company landing page

VNPT-IT & MISA

Internship - Fresher

Vietnam

2019

- Started at VNPT-IT as frontend intern
- Joined MISA working on integrating MISAEshop with delivery partners
- Worked with ASP.NET core, MariaDB, Vue.js, Nuxt.js
- Customized Vuetify and DevExpress components
- Used Figma for design collaboration

PROJECTS

- **Micro Frontend Dashboard** - Comprehensive micro frontend implementation using **Module Federation**, **Vite**, and **React** with independent deployment capabilities. Features include shared component library, lazy loading, and monorepo management with **PNPM Workspace**. Tech stack: React, TypeScript, TailwindCSS, Vue 3, Docker
- **Mini Ecom** - Microservice architecture e-commerce system featuring authentication, merchant, order, payment, and communication services. Implements **gRPC**, **RabbitMQ**, **PostgreSQL**, and **Redis** for scalable distributed system design
- **AI CV Chatbot Widget** - Developed an intelligent chatbot that answers questions about my professional experience and skills. Features **AI-powered responses**, **embedding capability** via script tag for any website, and **real-time conversation**. Implemented with modern web technologies for seamless integration

EDUCATION

- Bachelor of Information Technology, University of Engineering and Technology/ Vietnam National University, Hanoi (2017 - 2021)

ADDITIONAL SKILLS

Soft Skills Problem-solving, Adaptability, Client Communication, Team Collaboration, Project Management

Methodologies Agile/Scrum, Microservices Architecture, CI/CD, DevOps practices
